1.0 Executive Summary (22 April 2020)

Casual Games

KLab, which develops and runs games for smartphone apps, has revealed its plan to enter the market for casual games, representing all those computer games that can be easily played and enjoyed in a short time. The Company is likely to see some sales stemming from there in FY12/2020. However, FY12/2020 Company forecasts assume no sales from there with only development costs from a conservative standpoint. FY12/2020 Company forecasts have been disclosed in a range format as in the past years, while going for steady increases in sales and earnings in term of the median value. At the same time, the ranges suggest marginal profit ratio of 40%. Meanwhile, the Company advocates a variety of management strategy aimed at achieving stable long-term growth. On top of continuing to grow mainly in the game business, the Company has set up a target of providing high value on a global basis and of establishing "KLab" brand. For example, the Company, which has strengths on developing games based on third-party IPs, has abandoned its existing policy to focus on those of Japanese origins and is now eager to acquire IPs overseas as far as they have fans on a global basis. With respect to development of games, the Company is to focus on specialty genres. For example, it appears that the Company is considering horizontal deployment of the mechanism in "Captain Tsubasa: Dream Team" for the Company's games that belong to the genre of "sports".

3.0 Recent Trading and Prospects

Q4 FY12/2019 Results

In Q4 FY12/2019, sales came in at \(\pm\)8,732m (up 15.4% QoQ), operating profit minus \(\pm\)37m (versus \(\pm\)406m in the quarter immediately preceded), recurring profit \(\pm\)56m (down 84.4% QoQ) and profit attributable to owners of parent minus \(\pm\)832m (versus \(\pm\)417m in the quarter immediately preceded), while operating profit margin minus 0.4% (down 5.8% points QoQ). The Company has suffered from significant deficit in profit attributable to owners of parent, due to booking an impairment loss of \(\pm\)1,300m for an original IP title.

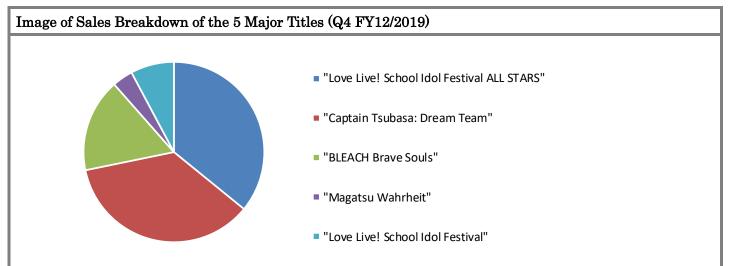

Source: Company Data, WRJ Calculation

On 26 September 2019, the Company launched a large-scale new title, "Love Live! School Idol Festival ALL STARS". Sales of commemoration contents are trending favorably. In Q3 (July to September), sales were booked only for 5 days from 26 to 30 September, while the Company enjoyed sales all through the three-month period in Q4 (October to December), having become the key factor for sales as a whole for the Company in Q4 increased substantially over Q3. At the same time, sales associated with "Captain Tsubasa: Dream Team" also increased favorably over the quarter immediately preceded. Both Japanese and global versions saw increased sales due mainly to solid performance of commemoration contents for the second anniversary of the launch worldwide. In Q4 over Q3, sales overseas as a whole for the Company also increased favorably, to which global version of "Captain Tsubasa: Dream Team" made a large contribution.

Meanwhile, sales declined quarter on quarter for "BLEACH Brave Souls", "Magatsu Wahrheit" and "Love Live! School Idol Festival". However, this was more than compensated for by contributions from "Love Live! School Idol Festival ALL STARS" and "Captain Tsubasa: Dream Team", having resulted in quarterly sales as a whole for the Company in Q4 the highest ever second only to the record high in Q3 FY12/2018.

With respect to "BLEACH Brave Souls", sales were favorable for contents associated with "Thousand-Year Blood War" and its novelized contents, but sales have failed to increase for both Japanese and global versions over Q3 when sales were driven by the fourth anniversary measures. For "Magatsu Wahrheit", the Company has implemented half-anniversary measures, but sales have not reached the level of Q3. For "Love Live! School Idol Festival", the Company has conducted a commemorative campaign to celebrate that the number of users exceeded 25m in Japan. Still, this was not enough to see increased sales over Q3. The Japanese version saw sales decreased and the global version was unchanged in sales.

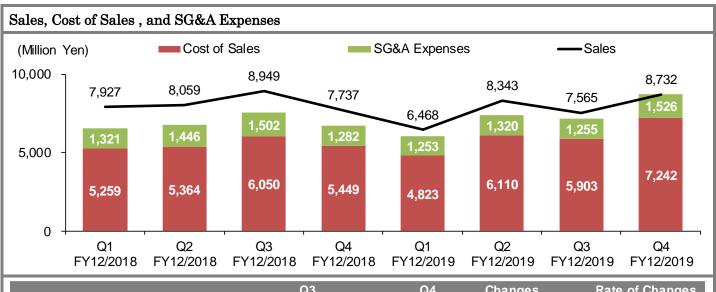

Source: Company Data, WRJ Calculation

As mentioned above, the Company has achieved a high level of sales as a whole in Q4, but operating profit margin has worsened significantly. According to the Company, sales of existing titles came down and there were one-off increases in expenses in line with launch of new title, "Love Live! School Idol Festival ALL STARS". The existing titles are represented by "Captain Tsubasa: Dream Team", "BLEACH Brave Souls", "Magatsu Wahrheit" and "Love Live! School Idol Festival", while the new title is "Love Live! School Idol Festival ALL STARS". Sales associated with all those collective 5 titles appear to have accounted for a majority of sales as a whole for the Company in Q4. In regards to the existing four titles, sales associated with "Captain Tsubasa: Dream Team" have increased as mentioned earlier, but this was more than offset by weakness of the remaining three titles. Thus, collective sales of the four existing titles came down over Q3.

In line with the launch of new titles, development costs commence depreciation for 24 months on a straight-line basis, after being capitalized up until that time begins. On top of this, costs for promotions and advertising are inevitably spent at the initial stage of launch. This was not exception for "Love Live! School Idol Festival ALL STARS." Although sales stemming from here appear to be substantial, this title did not contribute to earnings very much due to the high level of the breakeven point during the initial stage.

Meanwhile, as time goes by, the breakeven point of new titles is said to be trending downward. One-off expenses at the initial stage of launch will be gradually dissipated, while costs for operations and marketing will continue to be streamlined. Further, in 24 months, depreciation will be gone and the breakeven point for all those titles come down sharply from the initial level and changes of sales give substantial impacts to earnings. This tendency is generally observed for the above-mentioned four existing titles, albeit to varying degrees. The main point is that the collective sales of all those titles were on the decrease and thus earnings as well, according to the Company.

	Q3	Q4	Changes	Rate of Changes
	FY12/2019	FY12/2019	QoQ	QoQ
Labor Costs	991	998	+6	+0.7%
Outsourcing & Subcontracting	1,299	1,140	(159)	(12.3%)

PR & Promotions	530	763	+232	+43.8%
Other	441	469	+27	+6.3%
SG&A Expenses	1,255	1,526	+271	+21.6%

Source: Company Data, WRJ Calculation

In Q4, sales came in at ¥8,732m (up 15.4% QoQ) versus Cost of Sales ¥7,242m (up 22.7%) and SG&A Expenses ¥1,526m (up 21.6%). In other words, expenses have increased faster than sales and earnings have come down. The impact stemming from the launch of "Love Live! School Idol Festival ALL STARS" was also noted by the Company in Cost of Sales under Other, which increased and along with SG&A Expenses under PR & Promotions. The former had much to do with the start of depreciation for the development costs of "Love Live! School Idol Festival ALL STARS" to have had been capitalized prior to the launch, while the latter was due mainly to the burden of expenses for initial promotions associated with "Love Live! School Idol Festival ALL STARS".

Royalties & Commissions, accounting for the bulk of Cost of Sales, has increased significantly. Royalties represent payments of usage fees for third-party IPs (Intellectual Properties whose copy rights held by third-party companies and/or individuals) to holders of the copy rights. Out of the main 5 titles in Q4, "Love Live! School Idol Festival ALL STARS", "Captain Tsubasa: Dream Team", "BLEACH Brave Souls" and "Love Live! School Idol Festival" are third-party IP titles. In other words, it had been the case across the board that the Company was involved with third-party titles only until the Company's original title, "Magatsu Wahrheit" was launched on 23 April 2019. So, even now, this is a major feature for the Company to be almost exclusively exposed to third-party titles. Meanwhile, Commissions are payments to platforms that the Company pays for distributing its games. Specifically, they are those of Apple, Google, etc. All those platforms also work for the Company to collect compensations from users at the same time. At the end of the day, Royalties and Commissions have a tendency to change in line with sales, but increased rather faster than sales in Q4, which is mentioned as another factor for the correction of earnings.

Account Transfers in Cost of Sales is booked, stemming from that the Company "capitalizes costs of development for new titles prior to launch, comprising labor costs, outsourcing costs, etc. as software in progress" and that it "books negative costs of development due to account transfers associated with the said accounting treatment". That is to say, the Company capitalizes costs of development on the balance sheet as software in progress for new titles prior to the launch and thus this is not reflected on the income statement, while the software in progress transfers to software assets to be depreciated, which literally starts up depreciation in line with the launch for 24 months on a straight-line basis. At the same time, impact to the income statement begins.

In other words, the absolute amount of the value recorded as negative in account transfers equals costs of development for new titles during the period. The absolute amount has come down sharply to \(\frac{2}{4}\)4m in Q4 over \(\frac{2}{8}\)8m in Q3, which has generated the increases of Cost of Sales as much as the decreases in the cost analysis provided by the Company here. Meanwhile, this mostly attributed to "Love Live! School Idol Festival ALL STARS." Prior to the launch toward the end of Q3, development of this new title was underway and the absolute amount of account transfers was rather high. In contrast, this development was completed in Q4 and the absolute amount of account transfers has come down over Q3. So, eventually, this suggests that development of new titles prior to the launch was rather calm in Q4, after the development of "Love Live! School Idol Festival ALL STARS" was completed.

In terms of full-year results in FY12/2019, meanwhile, sales came in at ¥31,109m (down 4.8% YoY), operating profit ¥1,673m (down 66.5%), recurring profit ¥1,625m (down 67.5%) and profit attributable to owners of parent ¥383m (down 85.1%), while operating profit margin 5.4% (down 9.9% points). That is to say, the Company suffered from aforementioned impairment loss of ¥1,300m in Q4 to a large extent on a full-year basis too. In spite of the fact that the Company booked surplus of ¥465m as income taxes adjustment at the same time, profit attributable to owners of parent came down sharply over the previous year.

The Company conservatively examined future recoverability of software assets related to "Magatsu Wahrheit", whose depreciation began in April 2019. As a result, the balance of ¥1,300m for the assets was written off, having generated impairment loss to the same extent in Q4. Mainly due to this, profit before income taxes came in at ¥450m versus recurring profit of ¥1,625m. Meanwhile, the Company determined that it could recover deferred tax assets, taking into account business performance in FY12/2019 and future performance trends. As a result, the Company booked surplus of ¥465m as income taxes adjustment concurrently having booked the impairment loss. Thus, total income taxes came in at ¥141m versus collective ¥606m of corporate tax, resident tax and business tax.

Elsewhere, as disclosed on 20 November 2019, the Company has resolved to dissolve a consolidated subsidiary KLab Global Pte. Ltd. on 16 December 2019 and is now proceeding with the liquidation process. Since around 2012, the Company has set up bases overseas to optimize personnel resources for developing games for markets overseas and has adopted a policy of establishing vertical international specialization. The Company set up bases in the United States, the Philippines, Singapore and China, where KLab Global Pte. Ltd. based in Singapore was in charge of publishing games overseas. Subsequently, however, the Company has been reforming its overseas strategy and it has announced a policy to concentrate marketing and development functions related to overseas expansion in Japan except for those of China. The Company has already accomplished liquidation in the United Sates and the Philippines in the past years, while the operations in Singapore continued without staffing.

In Singapore, there was a point of controversy to be resolved first and the Company had continued the operations for a while. To date, this has been resolved, having led to the current process of liquidation. Although it will not be able to collect receivables associated with the said subsidiary, the Company has already booked allowances for them in the past years, unlikely to generate a major impact on the Company's earnings in the future.

FY12/2020 Company Forecasts

In terms of median value of suggested ranges, FY12/2020 Company forecasts (released on 13 February 2020) are going for prospective sales of \(\frac{\pmax}{3}\)7,500m (up 20.5% YoY), operating profit of \(\frac{\pmax}{2}\),000m (up 19.5%), recurring profit of \(\frac{\pmax}{2}\),000m (up 23.0%) and profit attributable to owners of parent of \(\frac{\pmax}{1}\),425m (up 271.2%), while operating profit margin of 5.3% (down 0.05% points). As in the past years, full-year Company forecasts are suggested by ranges, i.e., \(\frac{\pmax}{3}\)5,000m to \(\frac{\pmax}{4}\)4,000m for prospective sales, \(\frac{\pmax}{1}\),000m to \(\frac{\pmax}{3}\),000m for operating profit, \(\frac{\pmax}{1}\),000m to \(\frac{\pmax}{3}\),000m for recurring profit and \(\frac{\pmax}{7}\)50m to \(\frac{\pmax}{2}\),100m for profit attributable to owners of parent.

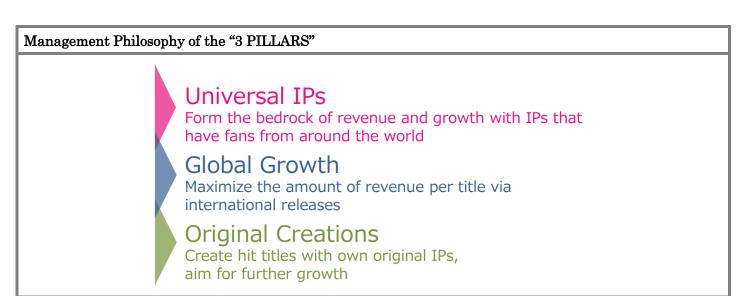

Source: Company Data, WRJ Calculation (CoE: median)

FY12/2020 Company forecasts assume sales stemming from launch of two new titles and of some non-Japanese versions of existing titles. However, this assumption is as of 13 February 2020 and the Company does not commit to the launch of all those titles. Meanwhile, the Company has set ranges as it all depends on sales lifecycle associated with existing titles, sales of new titles and non-Japanese versions of existing titles. For the upper end to the ranges, Company forecasts assume favorable sales for new titles and limited attenuation in sales of existing titles, while unfavorable sales for new titles and a major attenuation in sales of existing titles for the lower end. With respect to casual games, representing all those computer games that can be easily played and enjoyed in a short time, on which the Company is to work hard from FY12/2020, Company forecasts assume costs of development, but no sales from a conservative standpoint.

With respect to costs, Company forecasts are going for increased running costs (labor costs, outsourcing costs and depreciation) in line with the launch of new titles as well as for those of labor costs and hiring costs due to increased number of personnel. At the same time, Company forecasts also assume the balance of software assets to decline as it has just launched the large-scale new title, "Love Live! School Idol Festival ALL STARS", while assuming advertising costs roughly unchanged from the level in FY12/2019. Lastly, although in ranges for prospective sales, Company forecasts assume a certain level for fixed costs. Simply looking at the width of the ranges, i.e., ¥5,000m (¥35,000m to ¥40,000m) for sales and ¥2,000m (¥1,000m to ¥3,000m) for operating profit, it should be the case that marginal profit ratio is 40% (=2,000/5,000).

Long-Term Prospects

Hidekatsu Morita, appointed as representative director, president and CEO in March 2019 to have replaced founder Tetsuya Sanada (currently, director and chairman), has confirmed that the Company is primarily going for growth in the mainstay game business, while establishing the "KLab" brand by means of offering exceptional value on a global basis. As for the business policy, he aims for long-term sustainability for its game business through improved efficiency and systemization of operations, enhanced utilization of machine learning, AI as well as analytical tools, provision of merchandises as well as contents suitable region to region or by user category, and creation of the fan community. At the same time, he also raises a policy to improve the hit rate to increase earnings. This will be realized through development of games to be accepted on a global basis, pursuit of quality beyond expectations by users, maximization of earnings propelled by one source multi use (to materialize by distributing a single game title to diverse devices or platforms across regions) and extended marketing and promotions on a global basis. At the same time, Mr. Morita has made further development for the management philosophy of the "3 PILLARS" established since FY12/2017.

Source: Company Data

Specifically, it has evolved from what used to be "Japanese IPs" to "Universal IPs". It has remained unchanged that the Company pursues stability and growth of earnings by means of utilizing IPs that have fans from around the world, but it has abandoned a policy to focus on those with Japanese origins, currently trying to aggressive acquire IPs overseas as far as holding fans from around the world. As for the type of IPs to acquire, the Company will thoroughly concentrate on domains where the Company has expertise and thus be able to take advantage of.

In developing new games going forward, the Company will focus on specialty genres where the Company saw hit titles in the past, i.e., "sports" represented by "Captain Tsubasa: Dream Team," "ARPG (Action Role Playing Game)" represented by "BLEACH Brave Souls" and "rhythm action" represented by "Love Live! School Idol Festival" and "Love Live! School Idol Festival ALL STARS". For example, taking into account that "Captain Tsubasa: Dream Team" has become a hit worldwide, it appears that the Company considers horizontal deployment of mechanism in "Captain Tsubasa: Dream Team" to contents of other sports. Given that "BLEACH Brave Souls" has also become a hit worldwide, the Company believes that demand for action games is firm on a global basis. Meanwhile, on "rhythm action", the Company believes that it can take advantage of knowhow accumulated in "Love Live! School Idol Festival" and "Love Live! School Idol Festival ALL STARS".

With respect to entry into the casual game market, the Company mentions a reason that their value as media is improving and the market is growing fast as video advertising expands on a global basis. Furthermore, as casual games can be played simply and intuitively, they have users around the world as target and the Company should be able to utilize its strengths on marketing on a global basis, which is raised as another reason. On top of this, it is highly appreciated that they could compensate for correction of earnings during the period of development of large-scale titles as they could be developed in a short term with limited expenses.

Meanwhile, with respect to casual games, the Company is to set up earnings model based on billing revenues on top of pursuing video advertising revenues as found in so-called hyper casual games generally available at the moment. The Company calls games like these operation-based casual games. In general, casual games, played simply and intuitively, are not supposed to be played continuously for a long time, suggesting a difficulty to collect billing revenues. However, the Company advocates that operation-based casual games are supposed to be able to collect billing revenues as they can be played for a long time, given the involvement with "operation-based" functions.

The Current List of Announced Titles under Development (As of 13 February 2020) Development / **Title** Main IP Holder **Notes** Operation Entity To be operated by BANDAI NAMCO , a **BANDAI NAMCO** Entertainment Inc., the Japanese and Tales of Crestoria English version is scheduled to be released Entertainment Inc. KLab at the same time. Media mix project with KADOKAWA, codeveloped and to be operated by the **KADOKAWA** Chinese company ShengquGames Limited KLab **蘇椒湖郊** (formerly Shanda Games Limited). Co-developed with BushiroadInc, and プロジェクト ラブライブ! SUNRISE INC. which is to be released under Global プロジェクト ラブライブ! the global version by KLabwith English, Ver. Korean, Traditional Chinese, and Thai サンシャイン KLab language support. Global KLab Inc. is scheduled to release the global Ver. version. KLab Inc. has acquired the game licensing Game based on Kumamoto Prefecture / Not yet announced rights from ADK Emotions Inc. KLab Inc. will ADK Emotions Inc. (support model*) be in charge of project management and Kumamon

Source: Company Data

Currently, there are no publicly disclosed titles under development for casual games, but the above information has been disclosed as game titles under development as a whole for the Company. For example, the Company suggests that "Tales of Crestoria" is a new title to be launched in FY12/2020. This is a joint title with BANDAI NAMCO Entertainment Inc. and is scheduled to be launched in both Japanese and English. In addition, "Lapis Re:LiGHTs", which is being jointly developed with Shengqu Games Limited based in China, is also scheduled to be launched. The Japanese version will be launched from the Company and the Chinese version will be launched from Shengqu Games Limited. In addition to these two new titles, the Company suggests that development of four titles is to be commercialized as projects. Meanwhile, the Company also plans to launch global versions of existing titles.

supervision.

Further, the Company also plans to launch games based on "Kumamon". So-called support model is to be adopted here, which is defined as that of supporting development of Japanese IPs for use in games for the market overseas. Obtaining licenses for games from Japanese IP holders to aim at seeing revenues from overseas, the Company is to make progress with own operations overseas by means of co-developing games based on the licenses with developers overseas. So far, the Company has run this support model on "BLEACH Kyo · Kai-Tamashinokakusei: Shinigami".

The Company, which has strengths such as building relationships with IP holders in Japan and expertise in overseas expansion, is said to act as an intermediary in this support model. In other words, it matches IP holders in Japan looking for opportunities of earnings from overseas with developers overseas looking to develop games using Japanese IPs. In FY12/2020, the Company is going for two to four titles to be commercialized as projects.

4.0 Business Model

Developing and Running Smartphone-app Games

The Company develops and runs games for smartphone apps. Just like peers, the Company provides users with a mechanism (gacha) of purchasing virtual goods, etc. in games, while sales are booked from those billings. As far as we could see, "Capital Tsubasa: Dream Team" has been the most prominent out of all the main titles with sales as a whole for the Company. This has been the largest both in Japan and overseas, while sales overseas depend on this title to a large extent. "Captain Tsubasa" originally represents football-oriented manga by Yoichi Takahashi, having had appeared serially on *Weekly Shonen Jump* published by SHUEISHA. IPs associated with "Capital Tsubasa" are held mainly by Takahashi and SHUEISHA, while a fixed portion of the billings on "Capital Tsubasa: Dream Team" is paid to the holders of IPs as copyright fees, i.e., mainly to Takahashi and SHUEISHA.

"Captain Tsubasa: Dream Team"

- The world of Captain Tsubasa is now available as a football simulation game! Join Tsubasa, Misaki, Hyuga and all your favorites as you build your dream team and hit the pitch!
- Play online against friends and foes! Train football legend Tsubasa Ozora and other characters from the series to create the perfect dream team, then go head-to-head with players around the world.
- Watch Drive Shots, Tiger Shots, and more special moves from the Tsubasa series in stunning, beautifully rendered cut scenes! Feel the energy in the stadium and the smell of the pitch as your favorite characters' special moves come to life before your eyes.
- Play the game in Scenario Mode to experience all the greatest scenes from the Captain Tsubasa saga! Play against memorable opponents from the series and watch the story come alive!

Source: Company Data

TV Tokyo started broadcasting of animation TV show with this as the original in 1983 and saw rating of 21.2% or the highest ever, having caused a football boom in Japan. This was followed by broadcasting in over 50 countries worldwide and thus high awareness has been obtained on a global basis. After almost 40 years since the startup of broadcasting in Japan, boys and girls who were enthusiastic about it in those days are now in their thirties to fifties with not a little spending money and are the key users to pay for this game title. The situations overseas are not so different, although there is some time lag due to delayed broadcasting. In the first place, this is a story about football so popular across the world, which is another advantage for the high awareness of "Capital Tsubasa: Dream Team" on a global basis.

6.0 Other Information

"Koishite Kyabajo"

CYBIRD set up K Laboratory as its own division for research and development in January 2000, which is the origin of the Company, while "Koishite Kyabajo" is the origin of game business with the Company. This is an original IP title developed by the Company and it was launched in December 2009. With all sorts of specialty features, including easy-access interface with respect to females, applying adorable graphics, etc., this title steadily cultivated the market for F1-layer (females between 20 and 34 in age) which had never been well cultivated by anybody else till then. A player is to virtually become a hostess in a hostess bar and to speak to a variety of good-looking to come to seek for good services and/or experiences of romance, while trying to make money more than any other colleagues in compensations by coping with all those customers.

Source: Company Data

After listing on Tokyo Stock Exchange Mothers in September 2011 and listing change to Tokyo Stock Exchange First Section in May 2012, the Company launched third-party IP title "Love Live! School Idol Festival" in April 2013. By FY12/2016, sales and earnings with the Company used to almost all hinge on this single title, according to the Company. Meanwhile, the Company launched third-party IP title, "BLEACH Brave Souls" in July 2015, which was followed by launch of third-party title "Capital Tsubasa: Dream Team" in June 2017, having resulted in a series of launch for third-party titles. On top of this, both of them have become so substantial also with sales of their global versions to date.

Then, in FY12/2019, the Company launched its own IP title, "Magatsu Wahrheit" in April and third-party title, "Love Live! School Festival ALL STARS" in September. In other words, in Q4 FY12/2019, the Company set up a structure comprising 5 major titles, i.e., "Love Live! School Idol Festival", "BLEACH Brave Souls," "Captain Tsubasa: Dream Team," "Magatsu Wahrheit," and "Love Live! School Idol Festival ALL STARS". The Company has written off software assets on "Magatsu Wahrheit," but this was done in a conservative manner as mentioned earlier.

Company History

Date	Events
January 2000	Startup of K Laboratory as research and development division of CYBIRD
