1.0 Results Update (22 August 2022)

Optimization

On 5 August 2022, MUGEN ESTATE, running operations to purchase and resell secondhand real estate in Tokyo and the three surrounding prefectures, released its Q1 to Q2 FY12/2022 results. It has been revealed that the Company is seeing a trend of acceleration for its purchase, mainly of residential real estate, i.e., condos owned by segment, etc. and that it will optimize the balance between its emphasis on profitability and its focus on sales promotions for H2 so that initial full-year Company forecasts will be met. For Q2 (April to June), the amount of purchase settled has expanded up to some \$14,300m, including that of some \$7,400m (record high) on residential real estate, having increased by 85.1% over Q1 (January to March) as a whole. Meanwhile, the Company saw a sharp rise in gross profit margin for Q1 to Q2 (January to June) as a result of thorough emphasis on profitability, but this has led to shortfall in sales in terms of comparison with assumptions of Company forecasts at the same time. Still, the Company suffered from shortfall rather smaller for earnings. For H2, on the other hand, the Company says that it will somewhat relax its emphasis on profitability with the aim of strengthening its focus on sales promotions even more than before. Consequently, the Company is looking to the maximization of sales and earnings in terms of absolute amount.

3.0 Recent Trading and Prospects

Q1 to Q2 FY12/2022

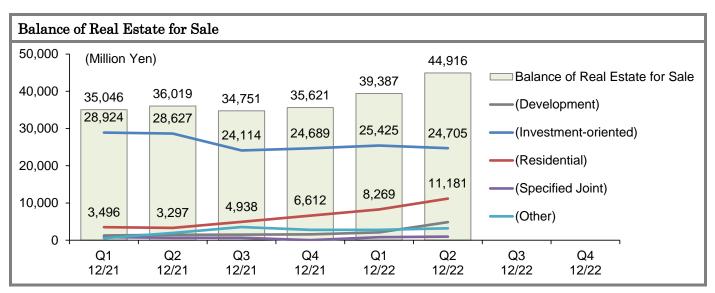

For Q1 to Q2 FY12/2022, sales came in at \$14,006m (down 21.3% YoY), operating profit \$1,093m (down 17.1%), recurring profit \$793m (down 24.5%) and profit attributable to owners of parent \$588m (down 20.3%). Meanwhile, gross profit came in at \$3,043m (up 5.6%) and SG&A expenses \$1,949m (up 24.7%), implying gross profit margin of 21.7% (up 5.5% points) and sales to SG&A expenses ratio of 13.9% (up 5.1% points), having resulted in operating profit margin of 7.8% (up 0.4% points).

Source: Company Data, WRJ Calculation (Q3 and Q4 FY12/2022, H2 Company forecasts, pro rata)

The segment of Real Estate Trading Business (purchase and resale of secondhand real estate) saw sales of \$12,925m (down 22.7%), segment profit of \$1,616m (up 2.0%) and segment profit margin of 12.5% (up 3.0% points), while sales here having basically comprised those of \$4,412m (up 8.5%) for residential real estate and \$8,303m (down 32.0%) for investment-oriented real estate. The Company has secured increased sales for residential real estate on which it has been focusing for some time, while having suffered from significantly decreased sales for investment-oriented real estate. Meanwhile, with respect to real estate development operations (to purchase properties as well as to plan, design, manage construction, lease and sell, while construction outsourced) and real estate specified joint operations (to originate and sell small-lot real estate products), both of which are now developed as new growth drivers from a long-term perspective, it appears that the start-up is somewhat behind the initial expectations.

Meanwhile, the segment of Real Estate Trading Business accounted for 92.3% of sales for the Company as a whole and 81.7% of segment profit, implying that the Company's performance as a whole mentioned above hinges on that of this segment to a large extent. The Company saw a record-high level of gross profit margin for Q1 due to thorough emphasis on profitability, but sales had to stagnate as a result of this, which was followed by a similar situation for Q2. On the other hand, SG&A expenses has increased significantly for Q1 to Q2, due to aggressive recruitment and purchase in anticipation of long-term growth. During the said period, the Company saw a successful hiring of new graduates and mid-career employment, having resulted in net increase by 12.3% or 30 for the number of personnel on a consolidated basis. At the same time, the Company says that it saw increased consumption tax charges at the SG&A level in line with increased purchase.

Source: Company Data, WRJ Calculation

For Q1 to Q2, the Company saw a surge in purchase and a stagnation in sales at the same time, having resulted in net increase by no less than \$9,294m (26.1%) from \$35,621m to \$44,916m for balance of real estate for sale. Here, again, the Company saw an increase outstanding for residential real estate on which it has been focusing for some time. In fact, the Company set up new service offices dedicated to purchase and resale of residential real estate, collectively 5 in the number, i.e., in Ogikubo, Ikebukuro, Akabane, Kita-Senju and Funabashi, for FY12/2021, while it appears that they have begun steadily expanding their contribution during the said period.

FY12/2022 Company Forecasts

FY12/2022 Company forecasts (announced on 14 February 2022) have remained unchanged, going for prospective sales of \$38,847m (up 14.4% YoY), operating profit of \$2,642m (up 12.1%), recurring profit of \$2,066m (up 16.7%) and profit attributable to owners of parent of \$1,314m (up 3.0%), while operating profit margin of 6.8% (down 0.1% point). At the same time, Company forecasts have remained unchanged for prospective annual dividend, going for \$17.00 per share, implying payout ratio of 30.2%.
